Please find the project details below:
- **Project Name**: Custom Collaboration Platform for Students and Startups
- **Project Scope**: The project aims to build a collaborative platform that connects students with startups for real-world project development. It allows startups to post problem statements and receive proposals from students, who can track their progress, collaborate using GitHub, and receive certificates or letters of recommendation upon completion. The platform includes role-based dashboards, proposal management, milestone tracking, and authentication to ensure a secure and structured experience.

We confirm that the project prototype has been delivered and accepted by our organization.
Please feel free to contact us if you require any further information or clarification.
Thank you for your cooperation.

Sincerely,
For **Aakar Technologies**,
